I would recommend these courses to anyone! Understanding our students' novel way of learning brings to light a new technologically advanced paradigm.

- Robin Gass

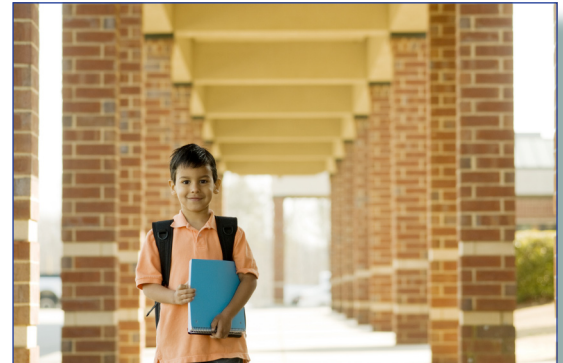

In my ideal school district, all teachers would be required to take these courses so we ALL can turn up the HEAT & get our students on fire. Those of us in this course are the ones born to teach.

- Patricia Jones

LoTi Classroom Teacher: Online

Implementing Action Research and 21st Century Learning to Impact Student Achievement

The LoTi Classroom Teacher (LCT) represents a series of online courses designed for classroom teachers, mentors, and building administrators. The emphasis is directed toward improving and refining the manner in which 21st Century Skills are used to promote student engagement and achievement. The LoTi Classroom Teacher series explores the concepts of *higher order thinking skills*, *differentiation*, *collaboration*, and the *use of technology* to build *effective learning communities* of inquiry and maximize student achievement.

This series lets participants engage in structured reflection within a networked environment involving other K-12 educators implementing similar instructional strategies. Participants are able to design lesson plans and instructional units representing the higher levels of technology implementation (LoTi) as well as catalogue specific resources that support this pivotal use of technology in the classroom.

LCT I: LoTi Foundations & Pedagogy	LCT II: LoTi 3+ Implementation Strategies	LCT III: LoTi 4+ Implementation Strategies
Factors Influencing Student Success	Technology Tools	Collaborative Learning Environments
Learning Modalities	The Few Computer Classroom	Essential vs. Engaging Questions
High Level Thinking Processes	Performance-based Assessment	EBAM Model
LoTi Framework	Implementation of Performance-based Assessments	Implementation of EBAM Model
Portfolio Preparation & Submission	Portfolio Preparation & Submission	Portfolio Preparation & Submission

Participating in the LoTi Classroom Teacher course series has provided me with resources and tools that I can utilize with the teachers I collaborate with. This course has also reinforced for me what I already believe—it isn't just about the technology... it is about high quality standards-based teaching. What I have learned has really helped me raise the bar in my instruction!

- Kathy Andrzejewski
